CATARRH.

The following symptoms of this complaint will enable the sufferer to detect it in its first stages: Pain in the head above the eres, frequent sneering, discharges from the noatrils and cold in the head, increased flow of tears, to dutiness, backing cough, raising of little oftensive crusts, tonsilities, inflammation extending to the lungs, causing hoarseness, difficulty in breathing, impairing of the senses of smell, taste, etc. If the afflicted will, when they first discover these symptoms, immediately call upon the doctor, they will receive a sure, speedy, permanent, and almost inexpensive cure.

YOUNG MEN

Who may be suffering from the effects of youthful follies or indiscretions, will do well to avail themselves of this, the greatest boon ever laid at the altar of suffering humanity. Dr. Spinney & Co. will guarantee to forfeit \$500 for every case of seminal weakness or private diseases of any kind or character which they undertake and fail to cure. They would, therefore, say to the unfortunate sufferer who may read this notice, that you are treading upon dangerous ground when you longer delay in seeking the proper remedy for your complaint. You may be in the first stage; remember you are approaching the last. If you are bordering upon the last, and are suffering some or all of its effects, remember that if you obstinately persist in procrastination, the time must come when the most skillful physician can render you no assistance; when the Acor of hope has been closed against you; when no angel of mercy can bring you relief. In no case have the doctors failed of success. Then let not despair work itself upon your imagination, but avail yourselves of the beneficial results of their treatment before your case is beyond the reach of medical skill, or before grim death

MIDDLE-AGED MEN.

There are many of the age of thirty to sixty who are troubled with too frequent evacuations of the bladder, often accompanied by a slight snarting or burning sensation, and kentenicooth mr, on examining the urinary deposits a ropy sediment will be found, and sometimes small particles of albumen will appear, or the color be of a thin milkish hue, again changing is a dark and torpid appearance. There are many men who die of this difficulty, ignorant of the cause, which is the second stage of seminal weakness. The doctors will guarantee a perfect cure in all such cases, and a healthy restoration of the genito-urinary organs.
